## AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently amended) A method for aggregating feedback, comprising:  
receiving a first set of travel information including information identifying a traveler, an itinerary of said traveler, and at least one travel service provider scheduled to provide services to said traveler;  
automatically generating after completion of travel associated with said itinerary, by a processor, a feedback request based on said first set of travel information and requesting specific feedback regarding said at least one travel service provider;  
transmitting said feedback request to said traveler;  
receiving feedback information from said traveler; and  
analyzing said feedback information received from said traveler by said processor.
2. (Original) The method of claim 1, wherein said first set of travel information is received from a travel organizer.
3. (Original) The method of claim 2, wherein said analyzing further comprises:  
determining whether at least a portion of said feedback information should be provided to said travel organizer.
4. (Currently amended) The method of claim 1, wherein said automatically generating further comprises:  
comparing a travel completion date from said first set of travel information to a current date.
5. (Original) The method of claim 1, wherein said automatically generating further comprises:  
determining a type of said at least one travel service provider; and

Application Serial No.: 09/773,021  
After Final Amendment and Response to January 12, 2005 Final Office Action

generating said feedback request based on said type.

6. (Currently amended) The method of claim [[4]]5, wherein said type is one of at least an airline, a car rental, a hotel, and a travel agency.

7. (Original) The method of claim 1, wherein said analyzing further comprises: determining whether said feedback information includes a complaint.

8. (Original) The method of claim 7, wherein said analyzing further comprises: determining whether said complaint requires a response from said at least one travel service provider.

9. (Original) The method of claim 8, wherein said analyzing further comprises: monitoring said complaint to determine whether a satisfactory response from said at least one travel service provider has been received.

10. (Canceled)

11. (Original) The method of claim 1, wherein said analyzing further comprises: determining whether at least a portion of said feedback information should be provided to said at least one travel services provider.

12. (Currently amended) A computer-implemented method for aggregating feedback, comprising:

receiving a first set of travel information including information identifying a traveler, an itinerary of said traveler, and a plurality of travel service providers scheduled to provide services to said traveler;

generating after completion of travel associated with said itinerary, by a processor, a feedback request form for each of said plurality of travel service providers, requesting specific feedback based on each of said plurality of travel service providers;

Application Serial No.: 09/773,021  
After Final Amendment and Response to January 12, 2005 Final Office Action

generating a summary feedback request form requesting general feedback for said itinerary and each of said plurality of travel service providers;  
transmitting each of said feedback request forms and said summary feedback request form to said traveler;  
receiving feedback information from said traveler, including completed ones of said feedback request forms and said summary feedback request form; and  
analyzing said feedback information received from said traveler by said processor.

13. (Original) The computer-implemented method of claim 12, wherein said first set of travel information is received from a travel organizer.

14. (Original) The computer-implemented method of claim 12, wherein said analyzing comprises:

reviewing information from each one of said feedback request forms and said summary feedback request form to determine whether any resolution is required.

15. (Original) The computer-implemented method of claim 12, wherein said analyzing comprises:

determining whether said feedback information received from said traveler includes a complaint.

16. (Original) The computer-implemented method of claim 12, wherein said analyzing comprises:

determining whether said feedback information received from said traveler includes a request for a response.

17. (Original) The computer-implemented method of claim 16, further comprising:  
generating a request for a response from one of said travel service providers; and  
monitoring said request for a response to determine if said travel service provider properly responds.

Application Serial No.: 09/773,021  
After Final Amendment and Response to January 12, 2005 Final Office Action

18. (Currently amended) An apparatus for aggregating feedback, comprising:  
means for receiving a first set of travel information including information identifying a traveler, an itinerary of said traveler, and at least one travel service provider scheduled to provide services to said traveler;  
means for automatically generating after completion of travel associated with said itinerary, a feedback request based on said first set of travel information and requesting specific feedback regarding said at least one travel service provider;  
means for transmitting said feedback request to said traveler;  
means for receiving feedback information from said traveler; and  
means for analyzing said feedback information received from said traveler.

19. (Currently amended) An apparatus for aggregating feedback, comprising:  
a processor; and  
a storage device in communication with said processor and storing instruction adapted to be executed by said processor to:  
receive a first set of travel information including information identifying a traveler, an itinerary of said traveler, and at least one travel service provider scheduled to provide services to said traveler;  
automatically generate after completion of travel associated with said itinerary, a feedback request based on said first set of travel information and requesting specific feedback regarding said at least one travel service provider;  
transmit said feedback request to said traveler;  
receive feedback information from said traveler; and  
analyze said feedback information received from said traveler.

20. (Currently amended) A machine-readable medium having stored thereon data representing sequences of instructions, said sequences of instructions which, when executed by a processor, cause said processor to:  
receive a first set of travel information including information identifying a traveler, an itinerary of said traveler, and at least one travel service provider scheduled to provide services to said traveler;

Application Serial No.: 09/773,021  
After Final Amendment and Response to January 12, 2005 Final Office Action

automatically generate after completion of travel associated with said itinerary, a feedback request based on said first set of travel information and requesting specific feedback regarding said at least one travel service provider;

transmit said feedback request to said traveler;

receive feedback information from said traveler; and

analyze said feedback information received from said traveler.
